Summary of Qualifications

- 2 years of experience in Mobile & Full-Stack Development creating software, and security tools within the technology sector
- Passionate about secure software development, cloud applications, cybersecurity, and currently pursuing CompTIA Security+, and AWS Cloud Practitioner certifications
- Proven ability to deliver web applications with a focus on secure coding and deployment
- Committed to continuous learning and professional growth, having completed Meta Front-End Developer and Meta Back-End Developer certifications through Coursera

Technical Skills

Operating Systems:	*Windows, Android, iOS, Mac OS,*
Applications & Tools:	*Microsoft Office 365, VSCode*
Tools:	*VMware, Google Workspace, Packet Tracer*
Project Management Fundamentals:	*Agile, Waterfall, Scrum,*
Languages:	*HTML, CSS, JavaScript, TypeScript, Python, SQL,*
Mobile Developemnt:	*ReactNative, Expo*
Cloud Platforms:	*Amazon Web Service*
Version Control & CI/CD:	*Git, GitHub*
Database Management:	*Firebase, PostgreSQL, SQLite*

Education & Certifications

AWS Cloud Practitioner Certificate	**Expected Completion 2025**
CompTIA Security+ Certificate	**Expected Completion 2025**
Google AI Essentials	**Completed 2025**
Google IT Support Professional Certificate	**Completed 2025**
Meta Front-End Developer Professional Certificate	**Completed 2024**
Meta Back-End Developer Professional Certificate	**Completed 2024**
Aerospace Manufacturing Engineering Technician (Incomplete)	**Jan 2018 – Jan 2019**
Centennial College| Toronto, ON	
Alberta Highschool School Diploma	**Jul 2014**
Morinville Community High School	Morinville, Alberta	
Junior IT Analyst Program	**Apr 2025 – Jul 2025**
NPower Canada	Toronto, ON	

14-week intensive online class training on the fundamentals of computer technology, and project management essentials.

- Configure device operating systems including Windows and Linux, while configuring disk partitions and filesystems
- Troubleshoot and problem-solve core service and support challenges while applying best practices for documentation, change management, and scripting
- Support basic IT infrastructure and networking, including DNS and DHCP, applying standard protocols with TCP/IP communications
- Configure and support PC and IoT device hardware
- Manage an organization's computers and users using Directory Services, Active Directory, and OpenLDAP
- Develop a complete understanding of the Agile project management lifecycle, key techniques and deliverables

Work Experience

Mobile & Web Developemnt   **Jan 2024 - Present**
Independant Project & Freelance│ Toronto, Ontario

- Designed, built, and deployed SecureNet, an AI-powered cybersecurity SaaS platform featuring live network discovery and threat detection
- Utilized FastAPI, PostgreSQL, React, Tailwind CSS, Stripe, Docker, and custom machine learning models for real-time security analytics
- Delivered secure, scalable web and mobile applications with responsive design.
- Collaborated with global clients to analyze their requirements and design scalable UIs with TypeScript, Tailwind CSS, and responsive frameworks
- Managed codebase with GitHub, implemented CI/CD pipelines via GitHub Actions, and documented features for client handoff

Diesel Technician II   **Jan 2023 – Dec 2023**
Penske Truck Leasing │ Mississauga, Ontario

- Completed preventative maintenance tasks and performed full vehicle inspections, reducing downtime by 18% according to company software metrics
- Used diagnostic tools to troubleshoot electronic control systems, wiring issues, and emission components
- Coordinated with service managers and logistics teams to streamline repair workflows and minimize asset hold times.
- Ensured compliance with safety and environmental regulations during maintenance
